# Doing the right thing

# Words are important

## Protect

- Looking after biodiversity and the ecosystem processes that create and maintain it in the long term.
- This involves managing all threats to secure species from extinction and ensuring that their populations are buffered from the impacts of the loss of genetic diversity and longer-term environmental events such as climate change.
- This includes, but is not restricted to, legal protection

## Maintain

At least no reduction in the following:

- the size of populations of indigenous species
- indigenous species occupancy across their natural range
- the properties and function of ecosystems and habitats
- the full range and extent of ecosystems and habitats
- connectivity between and buffering around, ecosystems
- the resilience and adaptability of ecosystems.

The maintenance of indigenous biodiversity may also require the restoration or enhancement of ecosystems and habitats.

# Same word different uses

Upper Hutt City Council peat soils map

SNA map incl Peatland

# Mangaroa Community The Flat

- Only houses on “the flat”
- 54 properties

# Mangaroa Community The Flat

- Green areas owned by landowners in the Blue area
- 75 properties

# Huge community response

# Questions?

Thank you for listening.
