Chapter 9 Te Awarua-o-Porirua Whaitua	9.1 Objectives	New		Both		
	Objective P.O1: The health of Te Awarua-o-Porirua's groundwater, rivers, lakes, natural wetlands, estuaries, harbours and coastal marine area is progressively improved and is wai ora by 2100.	New	Support	Part 1 Schedule 1	<i>The timeframes to achieve improved fresh water outcomes should include interim and measurable milestones (such as by 2035) and are not just 77 years in the future.</i>	Include interim measurable milestones such as by 2035, 2050 and 2070 as well as the ultimate 2100.
	Objective P.O2: Te Awarua-o-Porirua's groundwater, rivers, lakes and natural wetlands, and their margins are on a trajectory of measurable improvement towards wai ora.	New	Support	Freshwater		
	Objective P.O3: The health and wellbeing of coastal water quality, ecosystems and habitats in Pāuatahanui Inlet, Onepoto Arm and the open coastal areas of Te Awarua-o-Porirua is maintained or improved to achieve the coastal water objectives set out in Table 9.1.	New	Support	Part 1 Schedule 1		
	Table 9.1: Coastal water objectives.	New	Support	Part 1 Schedule 1		

	Objective P.O4: The extent, condition, and connectivity of habitats of nationally threatened freshwater species are increased, and the long-term population numbers of these species and the area over which they occur are increased, improving their threat classification status.	New	Support	Part 1 Schedule 1		
	Objective P.O5: Groundwater flows and levels, and water quality, are maintained.	New	Support	Freshwater		
	Objective P.O6: Water quality, habitats, water quantity and ecological processes of rivers are maintained or improved.	New	Support	Freshwater

Submission on Proposed Change 1 to the Natural Resources Plan for the Wellington Region, October 2023

Introduction

I am a resident of Lyall Bay and Chairperson of Guardians of the Bay, committee member of Predator Free Lyall Bay and member of Lyall Bay Coast Care. I have made numerous submissions in the past regarding stormwater and sewage management in the Lyall Bay area. I have lived in and around Lyall Bay most of my life and my parents were part of Wellington Clean Water Campaign that worked for over 10 years to get Wellington sewage tertiary treated at the Moa Point discharge. I have urban design and landscape architecture qualifications. This submission is a personal submission.

The water ways that run from the hills to the sea in Lyall Bay are primarily channelled into stormwater drains into the sea. They fit into the 'Wellington urban' mapping units 78 and 79 for Part Freshwater Management.

Lyall Bay has both residential urban, high risk industrial or trade premise and Wellington airport discharging stormwater into the bay. Lyall Bay is a high use recreational bay with users enjoying the coastal environment and recreational activities in the bay sea water.

Streams that come into Lyall Bay are unfortunately have been put underground into stormwater pipes. This includes the pipes that transport stormwater from the Strathmore Park Catchment and Wellington Airport at the eastern end of Lyall Bay. These pipes stop sand build up and are a reason for constant erosion at this end of the bay rather than sand build up into a crescent shaped beach.

Intensification of residential and commercial development on the Rongotai Isthmus will increase run off and flooding on the Isthmus as the ground water level and storm events are increasing due to climate change. The increased storm event run off of stormwater into Lyall Bay will have detrimental effects on the sand movement and sand dunes of the bay.

Submission

I support the direction of Plan Change I to the Natural Resources Plan for the Wellington Region.

I support stronger environmental regulation of what is put into our rivers, streams and stormwater into the sea.

I support the suite of big picture water objectives for freshwater and coastal water.

I support the need for less greenfield land development. However, I have reservations about intensification of existing areas, such as the Rongotai Isthmus, that will cause flooding and stormwater discharge into Wellington Harbour and Lyall Bay.

A spreadsheet with my stance on different sections of the plan is part of my submission (see attached). Please note I was unable to do bold track changes on my spreadsheet so had to use CAPITALS instead for any new words.
